

Fluency Self-Rating Form - Multifactorial

Busybeespeech.blogspot.com

<u>Conversation Type</u>	<u>Conversation Topic</u>	<u>Breathing</u>	<u>Fluency</u>
I'm naming, repeating, or saying words.	No strategies are being used to understand the topic.	I am running out of breath when I am speaking.	My speech is bumpy and I am forgetting to use my strategies.
I'm describing a picture or reading out loud.	With a lot of help from my clinician, I understand the topic.	I am slowing down my breath as I am speaking.	With reminders from my helper, my speech is less bumpy.
I'm talking with my parents or family I am comfortable with.	With a little help from my clinician, I understand the topic.	I am thinking about how I use my breath while I speak.	I can remember the strategies that help my speech stay smooth.
I'm talking with friends and strangers.	If I think, I can figure out the topic.	I am using my correct breath as I read aloud or talk.	I automatically know the strategies that help my speech stay smooth.
I'm good at talking with other people.	I can understand my topic.	I am breathing correctly while I am talking.	My speech is smooth.
